

ACCU TURF™

FIELD PRO 25 + 1 + 5

40% Methydure MU, WITH 35% UFLEXX®, SOP + 5% FE

Product Features:

- 40% of the nitrogen is derived from methylene urea.
- 35% of the nitrogen is from UFLEXX® stabilized nitrogen. UFLEXX® contains two inhibitors that reduce nitrogen loss to ammonia volatilization and nitrate leaching
- Combination of these two slow release nitrogen technologies provides much greater longevity.
- Contains 5% iron.
- All the potassium is in the safer sulphate form.

Product Benefits:

- Methylene urea slow release nitrogen is a trusted technology that has a gradual, consistent release and longevity that allows for the effective feeding of turfgrass with fewer applications for up to 12 to 16 weeks
- Urease inhibitor in combination with the nitrification inhibitor in UFLEXX® urea significantly increases nitrogen absorption by turfgrass to provide uniform growth, deep root mass and consistent colour intensity over 8 weeks.
- Iron provides deep green colour without excessive top growth.
